

G3 COMES INTO PLAY

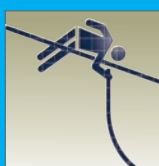

NEW Solar cell technology for maximum yields

- QCELLS Yield Security
- Outstanding low-light and temperature performance
- Full-Square format (mono)
- Q.ANTUM technology (poly)

NEW Frame technology for highest loads

- Elegant systems due to low construction height (35 mm frame)
- High-tech aluminium alloy
- Wind loads up to 5,400 Pa
- Reduced roof loading

NEW ARC technology for maximum hit rates

- 50% lower light losses and around 2% higher yields
- Long-term corrosion resistance due to high quality Sol-Gel roller coating processing

NEW Optimal design for lower logistics costs

- 40% more modules per pallet and container
- Up to 29% less logistics and storage costs for our customers
- Less packaging waste

NEW Box technology for maximum performance

- Optimal temperature management thanks to breathable membrane
- Stable performance due to low contact resistance

NEW Connector technology for highest security

- Secure thanks to increased tensile force of 500 N
- Long-term stability due to robust design and salt resistance
- MC4 intermateable
